

Principal's Message

Welcome to this special edition of Newsflash! It is National Maths Week. At school, we will be engaging with the new Primary Maths Curriculum, using hands on materials from our new Classroom Maths Kits and practicing lots of "Maths Talk". Every child is innately mathematical! Here are some ways you can engage with Maths at home this week. Check out events at:
<https://www.mathsweek.ie/2024>

What is "Maths Talk"?

Maths talk is a collaborative process where children share and discuss their ideas, helping them to understand maths better and communicate their thinking effectively.

Time & Money

Use your daily schedule to examine time. Explore money through change, budgeting and looking at bills and tax.

Play Games!

Spend an evening teaching your child a card game, do a puzzle, play a board game with dice or build with blocks. Playful experience & Shared Joy will deepen your child's love of Maths

Laundry

Sort, group, match and compare laundry items. Put all the towels together, do we have more black socks than white? Identify patterns.

In the Kitchen

Sort, group and match cutlery. Set the table, measure ingredients for recipes and baking. Set the timer and temp. Plan meals, budget & make a list.
